Pediatric Hypersomnia Screening Survey

Dr. Kiran Maski, a sleep physician and researcher has developed a questionnaire that aims to improve screening for narcolepsy and idiopathic hypersomnia in the community. We hope this survey will help school and health care professionals identify hypersomnia symptoms quickly. We are looking for participants to complete online surveys and we will provide a $10 gift card as a token of appreciation. Participation should take no more than 10-15 minutes.

Who is eligible for this study?

- Patients between the ages of 8-18 years who have been recently diagnosed (within 1 year) with narcolepsy or idiopathic hypersomnia
- Participants must be able to understand the purpose of the study

If you would like to learn more about the study or are interested in participating, please contact us at NeuroSleepResearch-dl@childrens.harvard.edu or call 617-919-6212.
